

- 🐾 Dolphins are marine mammals. They come out of the water to breathe air.
- 🐾 Bottlenose Dolphins are the most common in our area because they are friendly and live close to shore.
- 🐾 Other dolphins in New York waters are Common dolphins, Pilot whales, and Risso's dolphins.
- 🐾 Dolphins live and travel in groups called pods.
- 🐾 Dolphins are very intelligent and great at communicating. They make sounds such as clicks, whistles and squeals.
- 🐾 They eat different kinds of fish and squid.
- 🐾 Dolphins are fast swimmers – they go up to 22 miles per hour.
- 🐾 Dolphins live for 45 to 50 years.
